DETAILED ACTION

1. It would be of great assistance to the Office if all incoming papers pertaining to a filed application carried the following items:

1. Application number (checked for accuracy, including series code and serial no.).
2. Group art unit number (copied from most recent Office communication).
3. Filing date.
4. Name of the examiner who prepared the most recent Office action.
5. Title of invention.
6. Confirmation number (See MPEP § 503).

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/12/07 has been entered.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, "the inner decoder communicatively coupled to the synchronization module"; "an inner decoder communicatively coupled between the inner encoder and the modulator" of claim 23 and "an inner decoder communicatively coupled between the inner decoder and the modulator" of claim 24 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

4. Claims 2,4,8,10,12,13,16 are objected to because of the following informalities:
5. In claim 2,"wherein the step of generating equalizer parameters from the remodulated data output..." should be--- wherein the step of generating equalizer parameters from the pseudo-training sequence...--- .
6. In claim 4, "re-encoding the received data signal to produce a re-encoded signal" should be --- re-encoding the data output to produce a re-encoded signal---

7. In claim 8, line 2 and 4, "the remodulated data output" should be ---the pseudo-training sequence---
8. In claim 10, line 2, "the remodulated data output" should be ---the pseudo-training sequence---
9. In claim 12, line 3, "the received data signal" should be ---the data output---
10. In claim 13, line 8, "the received data signal" should be ---the data output---
11. In claim 16, line 2, "the remodulated data output" should be ---the pseudo-training sequence---.Appropriate correction is required.

Claim Rejections - 35 USC § 112

12. Claims 5,18,23-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
13. In claim 5, line 7, "the received data signal" lack clear antecedent basis.
14. In claim 18,"the processor" lack clear antecedent basis.
15. In claim 23, 24, the phrase "an outer decoder, communicatively coupled to the outer decoder" is not clear.
16. In claim 24, the phrase "an inner decoder communicatively coupled between the inner decoder and the modulator" is not clear.

Allowable Subject Matter

17. Claims 1-4,6-17,19-22 are allowed.
18. Claims 5, 18, 23-24 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

19. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fail to anticipate or render obvious the claimed method of equalizing digital data signals, comprising the steps of: demodulating and decoding an input signal having input data to produce a data output; *remodulating the data output to produce a pseudo-training sequence including an idealized input signal; generating equalizer parameters from the pseudo-training sequence; and equalizing the input signal according to the equalizer parameters* as claimed in claims 1, 9 and 17.
